TABLE OF CONTENTS

VOLUME 1 1900

PAGES

BLAKE, E. M., of Ithaca, N. Y. Two plane movements generating quartic scrolls 421–429

BÔCHER, MAXIME, of Cambridge, Mass. On regular singular points of linear differential equations of the second order whose coefficients are not necessarily analytic 40– 52

———— Application of a method of D'Alembert to the proof of Sturm's theorems of comparison 414–420

BOLZA, OSKAR, of Chicago, Ill. The elliptic sigma-functions considered as a special case of the hyperelliptic sigma-functions . . 53– 65

CAMPBELL, J. E., of Oxford, England. On the types of linear partial differential equations of the second order in three independent variables which are unaltered by the transformations of a continuous group 243–258

CHESSIN, ALEXANDER S., of New York, N. Y. On relative motion. 116–169

COOLIDGE, JULIAN LOWELL, of Cambridge, Mass. A purely geometric representation of all points in the projective plane . . . 182–192

DICKSON, LEONARD EUGENE, of Austin, Tex. Definition of the Abelian, the two hypoabelian, and related linear groups as quotient-groups of the groups of isomorphisms of certain elementary groups 30– 38

———— A new definition of the general Abelian linear group . 91– 96

———— Determination of an abstract simple group of order $2^7 \cdot 3^6 \cdot 5 \cdot 7$ holoedrically isomorphic with a certain orthogonal group and with a certain hyperabelian group 353–370

GORDAN, PAUL, of Erlangen, Germany. Formentheoretische Entwickelung der in Herrn White's Abhandlung über Curven dritter Ordnung enthaltenen Sätze 9– 13

———— Die Hessische und die Cayley'sche Curve 402–413

GOURSAT, E., of Paris, France. Sur la définition générale des fonctions analytiques, d'après Cauchy 14– 16

HILL, G. W., of West Nyack, N. Y. On the extension of Delaunay's method in the lunar theory to the general problem of planetary motion 205–242

HUTCHINSON, J. I., of Ithaca, N. Y. On certain relations among the theta constants 391–394

40986

PAGES

KASNER, EDWARD, of New York, N. Y. The invariant theory of the inversion group: geometry upon a quadric surface . . . 430–498

KRAUSE, MARTIN, of Dresden, Germany. Ueber Systeme von Differentialgleichungen denen vierfach periodische Functionen Genüge leisten 287–292

LOUD, FRANK H., of Haverford, Pa. Sundry metric theorems concerning n lines in a plane 323–338

MASCHKE, HEINRICH, of Chicago, Ill. Note on the unilateral surface of Moebius 39

——— A new method of determining the differential parameters and invariants of quadratic differential quantics . . . 197–204

MILLER, G. A., of Ithaca, N. Y. On the groups which are the direct products of two subgroups 66– 71

——— On the groups which have the same group of isomorphisms 395–401

MOORE, ELIAKIM HASTINGS, of Chicago, Ill. On certain crinkly curves 72– 90

——— A simple proof of the fundamental Cauchy-Goursat theorem 499–506

MORLEY, F., of Haverford, Pa. On the metric geometry of the plane n-line 97–115

MOULTON, FOREST RAY, of Chicago, Ill. On a class of particular solutions of the problem of four bodies 17– 29

OSGOOD, W. F., of Cambridge, Mass. On the existence of the Green's function for the most general simply connected plane region 310–314

PELL, ALEXANDER, of Vermillion, So. Dak. "D" lines on quadrics. 315–322

PUPIN, M. I., of New York, N. Y. Wave propagation over non-uniform electrical conductors 259–286

SMITH, PERCEY F., of New Haven, Conn. On surfaces enveloped by spheres belonging to a linear spherical complex 371–390

VAN VLECK, EDWARD B., of Middletown, Conn. On linear criteria for the determination of the radius of convergence of a power series. 293–309

WHITE, HENRY S., of Evanston, Ill. Conics and cubics connected with a plane cubic by certain covariant relations 1– 8

——— Plane cubics and irrational covariant cubics 170–181

WILCZYNSKI, E. J., of Berkeley, Cal. An application of group theory to hydrodynamics 339–352

WILSON, EDWIN B., of New Haven, Conn. The decomposition of the general collineation of space into three skew reflections . . 193–196

Notes and errata: volume 1 507–509
